INTRODUCTION

The purpose of this document is to provide a record of the number and characteristics of those individuals who have been committed to the custody of the Attorney General of the United States.

Trend tables, volume summaries and distributions of offender characteristics comprise this report. The trend tables provide comparative statistics for the last ten years on size, movement, average time served and average sentence length of offenders in Federal Prison System institutions.

Summaries of the volume of the Fiscal Years admissions and discharges, as well as the population on the last day of Fiscal Years 1983 and 1984 are included. The summary totals are the most accurate record of population size and change during the year. The reports on offender characteristics are organized into three sections: Year-End Population (Tables A), Admissions (Tables B) and Discharges (Tables C).

Prior and current reports only present statistics on Federal institution populations. The Discharge Tables however, provide data on average sentence length and average time served of individuals transferred from Federal Institutions to Contract Facilities and subsequently released on parole, mandatory release or by expiration of sentence.

Special attention should be given to the representativeness and completeness of the data in the characteristics tables. Reports which are not 100% complete are annotated with the actual reporting universe and the completeness of the report as a percentage of that universe. For example, there were 28,627 sentenced prisoners in Federal Institutions on September 30, 1984. A report on the sentenced population, which only totals 28,242, will be annotated "Universe= 28,627", and "Completeness = 98.7%." To further aid interpretation, some of the reports which show average sentence length have two total lines. Depending upon other variables in the report, average sentence length statistics can be heavily skewed by the very short sentences for immigration offenses, and the very long sentences for violent crime offenses. For this reason, one total line including and one total line excluding these two offense classes are provided. The violent crime class includes: assault, kidnapping, robbery, homicide and rape. Each of these reports has been footnoted.

Data on the number and characteristics of the population in Federal facilities are prepared in Federal Prison
